

# ACDP

## **Arthromax Center for Diabetic Pedorthics**

**Your Clinical Partner in  
Diabetic Foot Prevention  
&  
Limb Preservation**

STRENGTHENING HOSPITAL OUTCOMES BY PREVENTING ULCER  
RECURRENCE AND AVOIDABLE AMPUTATIONS THROUGH  
STRUCTURED PEDORTHIC CARE.

# Footwear and insoles are a medical intervention — not an accessory.

## The Clinical Reality

- Recurrent plantar ulcers post-healing
- Pressure-related breakdown despite surgery
- Generic footwear → poor compliance
- Preventable readmissions & limb loss

## Our Clinical Solution

- Assess risk stratification, deformity & pressure
- Prescribe medical-grade footwear & custom insoles
- Protection through ulcer offloading
- Post-healing protocols for prevention of recurrence

# PODIATRIC SERVICES & REFERRAL PATHWAY

## Our Diabetic Podiatry Services

Risk Assessment & Stratification (IWGDF Guidelines)

Preventive Podiatric Care: Callus, nail & skin protection

Medical footwear & Custom insoles

Ulcer Recurrence Prevention

## Patients Who Benefit Most from Diabetic Podiatry

Loss of protective sensation

Callus, corns, or pre-ulcer lesions

Healed or recurrent ulcers

Foot deformity or Charcot changes

Before Podiatry

After Podiatry

# Why Arthromax Center for Diabetic Pedorthics?

Dedicated diabetic podiatry service  
Evidence-based foot protection  
Ethical, non-retail clinical model

Works alongside endocrinology & surgery  
No interference with wound or surgical care  
Documentation shared with referring physician

UK-Registered Prosthetist & Orthotist  
Evidence-based diabetic foot protocols  
Integrated podiatry, orthotics & footwear care  
Central fabrication & quality control
